Huntington Farms

Architectural Survey File

This is the architectural survey file for this MIHP record. The survey file is organized reverse-chronological (that is, with the latest material on top). It contains all MIHP inventory forms, National Register nomination forms, determinations of eligibility (DOE) forms, and accompanying documentation such as photographs and maps.

Users should be aware that additional undigitized material about this property may be found in on-site architectural reports, copies of HABS/HAER or other documentation, drawings, and the “vertical files” at the MHT Library in Crownsville. The vertical files may include newspaper clippings, field notes, draft versions of forms and architectural reports, photographs, maps, and drawings. Researchers who need a thorough understanding of this property should plan to visit the MHT Library as part of their research project; look at the MHT web site (mht.maryland.gov) for details about how to make an appointment.

All material is property of the Maryland Historical Trust.

Last Updated: 05-03-2004

HO-19
HUNTINGTON FARM
Clarksville
Private

circa 1840 and 1875

Huntington Farms is composed of two sections which form an L plan. It stands back on the north side of Brighton Dam Road, a two and a half story brick (laid in English garden wall brick bond) gabled roof structure, five bays wide and two bays deep with a three bay wide, two bay deep north wing lying flush with its east wall. Wide brick chimneys are set into its east and west walls and the north wall of the north wing.

Fenestration is rectangular, proportionally scaled, vertically aligned with six-over-six lites decorated with stretcher brick flat-arched lintels, projecting stone sills and shutters.

Built by John T. Hardey, brother of Dr. Hardey who built neighboring Montrose, the property until recently remained in the family. Burned to the ground it was rebuilt circa 1875 and is representative of the manner in which the Romanesque revival hit the United States farm house. The Roman arched paneling in the central rectangular door as well as the Roman arched window in the central intersecting gabled roof dormer exemplify this style.

DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE			
<p>Huntington Farms faces south and is composed of two sections, which form an L plan. The main south section of the house built circa 1840 faces south on the north side of Brighton Dam Road, while the north wing extends from its north wall. A three bay wide, two bay deep north wing lies on the north wall of the south wing. It lies flush with the east wall of the south wing, holding three first and second floor double-hung windows with six-over-six lites on its east wall. They are proportionally scaled and decorated with stretcher brick flat arched lintels and flat wooden sills. A gabled roof dormer window is centered into its gable roof which runs north-south and intersects with the gabled roof of the south wing (front of house) which runs east-west. Two six lite casement windows are set into this central dormer.</p> <p>The stone foundation of this part of the house holds a cellar door and a six lite basement window on its east elevation. Seven wooden steps on the east lead to the wooden platform of a wooden gabled roof open porch on the north wall which covers a rectangular east bay entrance door holding twelve lites, surmounted by a stretcher brick flat arched lintel. This north wall also holds a second floor double hung window with six-over-six lites in its west bay, decorated with a flat arched stretcher brick lintel and two third floor casement windows holding six lites, each surmounted by header brick flat lintels. The porch can be approached from the west by five wooden steps. A brick chimney is centered into its north wall.</p> <p>A partially enclosed shed roofed porch lies along the west wall of this section of the house. A rectangular door surmounted by a three lite transom lies in the south bay of this west wall. This door was the west entrance to the original house, another entrance lying on the south wall.</p> <p>Huntington Farms south wing faces Brighton Dam Road. It is a five bay wide, two bay deep, two and a half story high brick structure laid in English garden wall brick bond with a central intersecting gable centered into the south side of its gabled roof which runs east-west. This latter holds a Roman arch, double-hung window with two-over-two lites, decorated with a header brick Roman arch lintel.</p> <p>A rectangular double door with Roman arch paneling, surmounted by a three lite transom and flanked by two vertical lites is centered into the south wall. A one story hipped roof open wooden porch extending along the central three bays is supported by four large square front posts and two pilasters applied to the south wall of the house between the first and second bays and the fourth and fifth bays. A low wooden railing extends outward to the east and the west wall of the house encompassing a brick terrace which extends from the wooden floor of the open portico.</p> <p>The east and west walls of this south wing hold a first and second floor double-hung window with six-over-six lites in the north bay and two third floor square double-hung windows with two-over-two lites. Brick chimneys are inset into the center of its east and west walls.</p> <p>Fenestration is rectangular, proportionally scaled, vertically aligned, double-hung with six-over-six lites decorated with stretcher brick flat arched lintels, projecting stone sills and shutters.</p> <p>Interior features original mantels and woodwork in the south wing and separate one way stairs on the north wall of the north wing. The attic of the north wing is believed to have been used for the slaves. Another narrow</p>

Hungtington Farms

staircase leads from the west entrance of this older section of the house, estimated to have been constructed in the early 1800's.

Barns lie east of the property and an old burial ground behind the house, where both the family along with their slaves is buried. A brick kiln is located on the property used by the slaves to make the bricks for the building.

*Huntington Farms was burned and rebuilt according to Mr. Hardey Randall, circa 1875.

STATEMENT OF SIGNIFICANCE

Huntington Farm was built by John T. Hardey, brother of the Dr. Hardey who built Montrose. His daughter, Ella Hardey married Tom Clarke and remained at Huntington Farms, leaving the property to her son Alan Clarke who bred and trained some of Maryland's finest race horses.

This fine house, originally built in the 1840's was burnt to the ground and rebuilt circa 1875 or prior. It is a fine example of the way in which the Romanesque revival hit the United States farm house. The Roman arched paneling in the double entrance doors as well as the Roman arched window in the central intersecting gabled roof dormer are representative of this fact.

Huntington Farm has been designated by the State Critical Areas Planning Program as an area and historic residence suitable for designation as a critical area of State concern suitable for preservation.
